Rotary Barrel Hand Pump

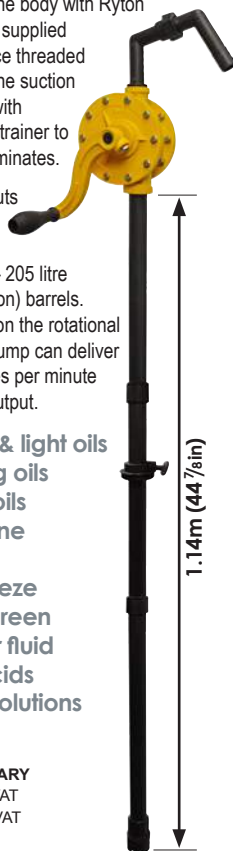

Chemical & Petroleum

A lightweight corrosion resistant pump for use with both petroleum and waterbased chemicals. The pump features a Polypropylene body with Ryton veins and is supplied with a 3 piece threaded Polypropylene suction tube, fitted with an internal strainer to catch contaminants.

Two bung nuts enable the pump to be used on 50 - 205 litre (15 - 55 gallon) barrels. Dependant on the rotational speed the pump can deliver up to 35 litres per minute maximum output.

- Heavy & light oils
- Heating oils
- Motor oils
- Kerosene
- Diesel
- Anti freeze
- Windscreen washer fluid
- Mild acids
- Alkali solutions
