

HOSE CLIPS

Hose clips are ideal for fixing flexible rubber hoses, plastic hoses and flexible pipes and can be used around the home, in the garden, workshop or the garage, in most applications where a water or air tight seal is required. A slotted hex fitting allows tightening and untightening with either a screwdriver or spanner.

Wing Screw Hose Clips

The non-perforated worm drive used on these hose clips provide a high thread strength with a smooth running, snag-free winding surface. This user friendly product features a comfortable, plastic, easy-grip wing screw that allows tool-free tightening or loosening of the clips. Manufactured from mild steel and zinc plated to aid corrosion resistance.
