### 36W LED Tripod Light Pole

The pole light has many great features that offer a unique solution to lighting with 336 LEDs that provide 3000 lumens of light to a radius of 360°. The lamp is compact, lightweight and maintenance free with a low power consumption which remains cool to the touch while in use. The pole light features a built in tripod enabling the lamp to be set up in seconds. The 900mm opal polycarbonate diffused lens is impact and scratch resistant, providing a safe, glare-free bright light that illuminates the workplace. Total height 1250mm. The addition of a power outlet allows the light to be used in series or in conjunction with a power tool. Fitted with a detachable shoulder strap, 3 metre cable and an approved plug. Ideal for indoor or outdoor use.

**POWER Take-off**

Allows lights to be run in series or used with power tools.
