

ABRASIVE STONES

Abrasive stones are available in many forms and are primarily designed to grind steel and hone the cutting edge of steel cutting tools. Depending on their intended use stones are manufactured using aluminium oxide or silicone carbide and are available for both hand and power tool applications.

Oilstone Box

To avoid workshop dust and unwanted oil deposits, this crafted beech oilstone box is designed to store any standard oilstone. The inside corners can be cut to suit other sizes.

Internal size:
205 x 50 x 25mm

FAIOSBOX
£9.32 Ex VAT £11.18 Inc VAT

Combination Oilstones

Combination stones are manufactured from aluminium oxide with two sharpening faces. The coarse face is for sharpening dull tools and the medium/fine face is for final honing to give a keen lasting edge. These stones may be used dry or lubricated using oil.

Coarse **120 Grit**
Fine **240 Grit**

100 x 25 x 12.5mm
