

## SQUARES

The finest hardwood is used in the manufacture of these high quality bevel gauges, mitre squares and try squares. The hardwood is stable, comfortable to use and has a high quality appearance. The blades have been treated against rust giving them the traditional blued steel appearance. Other quality features of Faithfull squares are the double heavy-gauge brass facings and the careful riveting, which helps to maintain accurate angles.

## Carpenters Try Squares

Best quality hardwood stocks with blued spring steel blades. Brass faced to ensure accuracy and to provide protection against damage. The blade is securely fixed in place by solid rivets for long lasting durability.
