

PLANES

Made with a quality grey cast iron body for strength and stability with precision ground base and sides for flatness and squareness. Machined seatings eliminate movement and blade judder. A lever cap with a brass locking screw secures the blade assembly and enables easy release for sharpening. Wooden handles and guidance knobs maximise user comfort. A solid brass blade adjustment nut completes the appeal of these traditional tools.

Finishing Plane

For final finishing of cabinet work and general joinery.

Overall length: 235mm
Blade width: 45mm
