

## SASH CLAMPS

Quick release slide

## Aluminium Sash Clamps

These clamps offer a low cost alternative for light to medium-duty clamping tasks. Constructed from a 'U' box section aluminium extruded bar and fitted with a cast head and foot, the construction design makes these clamps both lightweight and strong. The quick-release slide enables the clamping capacity to be changed in an instant, with adjustment slots situated at 25mm (1in) increments along the bar. Deep cut Acme threads on the mainscrew and a tommy bar combine to provide a quick and powerful clamping action.

	LENGTH	CAPACITY	Ex VAT	Inc VAT
FAISCAL36	900mm (36in)	800mm (32in)	£21.25	£25.50
FAISCAL48	1200mm (48in)	1100mm (44in)	£22.70	£27.24

## Sash Clamps

Heavy-duty clamps manufactured from a high quality carbon steel bar with large malleable iron clamping heads. The clamp bars have a black oxide coating with powder coated heads for complete rust protection. Other features include a high grade steel mainscrew with a wear resistant Acme thread, which applies pressure quickly and smoothly. Tail slides are easily adjusted and secured by a steel pin passing through one of the locating holes. Tail slide and heads are flat bottomed so that the clamp can stand upright without support.

	LENGTH	CAPACITY	Ex VAT	Inc VAT
FAISC600	730mm (29in)	600mm (23in)	£34.23	£41.08
FAISC900	1030mm (40in)	900mm (36in)	£38.94	£46.73
FAISC1200	1330mm (52in)	1200mm (48in)	£43.66	£52.39
FAISC1800	1930mm (76in)	1800mm (70in)	£48.39	£58.07

## T Bar Clamps

A robust clamp for extremely heavy-duty applications with the option of fitting to a workbench. The extra heavy 'T' bar construction and large malleable SG iron clamping heads and stock are virtually unbreakable and make this clamp extremely durable. The high grade sprung steel mainscrew incorporates an Acme thread for wear resistance. The entire clamp is protected by a rust-resistant powder coating.

Wood batten not included

## Sash Clamp Heads

A low cost alternative to full size bar clamps, these clamp heads can be easily fitted onto any length of wooden batten with a cross section of 50 x 25mm (2 x 1in). A light-duty clamp, as long and strong as the timber used, is quickly produced by drilling two holes to accommodate the clamp heads.
